Career

The first part of my career, 1980 to 1996, was spent in the University of Montreal's Department of Economics. From 1996 to 2004, I served as the director of the journal *Assurances et gestion des risques*. Since June 1st 1996, I have been the holder of the Risk Management Chair (which became the Canada Research Chair in Risk Management on January 1st 2004) and a professor in finance at HEC Montréal. In June 1993, I became an associate researcher for the *Chaire d'économie de l'assurance* at Université de Paris X Nanterre. Since June 1984, I have been an associate researcher with the University of Montreal's *Centre de recherche sur les transports* now the *Centre interuniversitaire de recherche sur les réseaux d'entreprise, la logistique et le transport* (CIRRELT). I served as this Centre's assistant director for two academic years. My principal mandate was to prepare the FCAR-Centre application and the 1995-2000 academic program. During the opening years of this 21st century, I have been the scientific director of Montreal's *Institut de finance mathématique* (IFM²), the founder and codirector of HEC Montréal's Centre for research on e-finance, and the codirector of the *Centre interuniversitaire sur le risque, les politiques économiques et l'emploi* (CIRPÉE). I also set up HEC Montréal's *Laboratoire de calcul en finance et assurance* (LACFAS) which received in 2009 from the CFI an additional \$5 million grant. In this same period, I obtained funding of over \$14 million for investment in the creation of a multidisciplinary research environment (combining finance, economy, and quantitative methods) at HEC Montréal, a research environment which, we are happy to say, measures up to that in all the other Canadian universities. Since January 1st, 2007, I am the Editor of *The Journal of Risk and Insurance*, the flagship journal of the American Risk and Insurance Association. I have been member of the HEC Montréal board of Directors since 2009 and president elect of the Canadian Economic Association since 2011.

My teaching and research activities are marked by a number of achievements:

Books published: Five books were brought to press, two of which— *Contributions to Insurance Economics* and *Foundations of Insurance Economics: Readings in Economics and Finance*— (counting a total 1,250 pages) are heavily used worldwide in insurance programs, at the doctoral level.

I also published, at Kluwer, a reference book entitled *Handbook of Insurance*; it contains more than 30 chapters totalling about 1,000 pages and including contributions from the 40 best researchers in the field. This book received the Kulp Wright Award from the American Risk and Insurance Association, by which it was described as : "...an

outstanding contribution to the literature of risk and insurance.” This book has been translated in Chinese in 2008. A new edition is in preparation.

Other publications: A dozen chapters in various books and more than 150 articles in prestigious scientific journals such as: *Journal of Political Economy* (2); *International Economic Review* (2); *Review of Economic Studies* (2), *Review of Economics and Statistics* (4); *Journal of Risk and Uncertainty* (6); *Journal of Risk and Insurance* (3), *Journal of Econometrics* (2), and *Management Science*.

Teaching in other universities: Courses for a diploma in advance studies (DEA) at the Université de Paris X Nanterre, from 1993 to 2005, and, for two years, at the Université de Toulouse.

Presentations: Almost 300 scientific presentations (England, Germany, Canada, the United States, Spain, France, Italy, and other countries).

Director and codirector of research: 5 postdoctoral trainees (including two from France and one from Belgium); 24 doctoral candidates (including three from France) and 60 masters papers or reports.

Current supervisions: 8 doctoral theses and 2 masters theses.

At least 10 of the trainees or students supervised are now university professors (South Korea, Toronto, Amsterdam, Strasbourg, Halifax, Paris, Tunis, Casablanca, Montreal).

Public profile
